

# 2016 Consolidated Financial Statements

Chinook Energy Inc. | 1000, 517 – 10th Avenue S.W. Calgary, Alberta T2R 0A8 TSX:CKE

## Management's Report

The management of Chinook Energy Inc. ("Chinook") is responsible for the preparation of the consolidated financial statements. The consolidated financial statements have been prepared by management in accordance with International Financial Reporting Standards and include certain estimates that reflect management's best estimates and judgments. Management has determined such amounts on a reasonable basis in order to ensure that the consolidated financial statements are presented fairly, in all material respects.

Management is responsible for the integrity of the consolidated financial statements. Internal control systems are designed and maintained to provide reasonable assurance that assets are safeguarded from loss or unauthorized use and to produce reliable accounting records for financial reporting purposes.

KPMG LLP (the "Auditor") was appointed by Chinook's shareholders to express an audit opinion on the consolidated financial statements. The Auditor's examination included such tests and procedures, as the Auditor considered necessary, to provide a reasonable assurance that the consolidated financial statements are presented fairly in accordance with International Financial Reporting Standards.

The Board of Directors is responsible for ensuring that management fulfills its responsibilities for financial reporting and internal controls. The Board of Directors exercises this responsibility through the Audit Committee, with the assistance from the Reserves, Safety and Environmental Committee regarding the annual review of Chinook's petroleum and natural gas reserves. The Audit Committee, composed of independent directors, meets regularly with management and the Auditor to ensure that management's responsibilities are properly discharged, to review the consolidated financial statements and recommend that the consolidated financial statements be presented to the Board of Directors for approval. The Audit Committee also considers the independence of the Auditor and reviews its fees. The Auditor has access to the Audit Committee without the presence of management.

# INDEPENDENT AUDITORS' REPORT

To the Shareholders of Chinook Energy Inc.

We have audited the accompanying consolidated financial statements of Chinook Energy Inc., which comprise the consolidated statements of financial position as at December 31, 2016 and December 31, 2015, the consolidated statements of operations and comprehensive loss, changes in shareholders' equity and cash flows for the years then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

## *Management's Responsibility for the Consolidated Financial Statements*

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

## *Auditors' Responsibility*

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

## *Opinion*

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Chinook Energy Inc. as at December 31, 2016 and December 31, 2015, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards.

# Notes to the Consolidated Financial Statements

Year ended December 31, 2016 and 2015

Tabular amounts in thousands of Canadian dollars, except as noted

## 1. Reporting Entity

Chinook Energy Inc. is a Calgary-based petroleum and natural gas production company focused on development and exploration opportunities in western Canada.

These consolidated financial statements for the years ended December 31, 2016 and 2015 (these "Financial Statements") include the accounts of Chinook Energy Inc. ("CEI") and two directly held wholly-owned subsidiaries: 1542991 Alberta Ltd. ("WOGH GP") and Storm Ventures International (BVI) Limited ("Storm (BVI)").

From June 10, 2016 to December 12, 2016, the consolidated statements of operations and comprehensive loss and consolidated statements of cash flow also include the accounts of Tournament Exploration Ltd., which subsequently changed its name to Craft Oil Ltd. and then Craft Oil Inc. ("Craft"), a privately owned Calgary-based petroleum and natural gas production company (collectively, including all three subsidiaries, "Chinook").

On June 10, 2016 (the "Closing Date"), CEI completed the acquisition of 70% of Craft's issued and outstanding common shares pursuant to an asset purchase and sale agreement (the "PSA") dated and effective May 1, 2016 (see note 5). As a result, Craft became a partially-owned but controlled subsidiary of CEI. In consideration, CEI transferred most of its non-Montney producing and undeveloped properties in Alberta, Canada, and the associated decommissioning obligations, in addition to \$0.9 million of cash to Craft (the "Subject Assets"). Since CEI maintained control over the Subject Assets, the measure of its consideration for Craft's common shares on the Closing Date was calculated at \$29.1 million based on the 30% non-controlling interest in the carrying values of the Subject Assets. Exclusive of the Subject Assets consideration, the fair value evaluated for Craft's net assets on the Closing Date was used to determine a \$1.6 million non-controlling interest in Craft's common shares. These measures are initially reported as non-controlling interest on the consolidated statements of financial position. The non-controlling interest portion in Craft's financial results from June 10, 2016 as included in these Financial Statements is removed from Chinook's consolidated results through the net loss attributable to non-controlling interest account on the consolidated statements of operations and comprehensive loss.

On December 12, 2016, Chinook completed a plan of arrangement under the Business Corporations Act (Alberta), whereby all of CEI's shareholdings in Craft were distributed to Chinook's shareholders (the "Craft Share Distribution") (see note 6). On completion of the Craft Share Distribution, CEI's control over Craft's operations ceased. As a result, for the period subsequent to December 12, 2016, the accounts of Craft are not reflected in these Financial Statements.

All intercompany balances and transactions have been eliminated.

## 2. Basis of Presentation

### Statement of Compliance

These Financial Statements have been prepared by management using accounting principles consistent with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). A summary of Chinook's significant IFRS accounting policies are presented in note 3. These Financial Statements were approved and authorized for issuance by Chinook's Board of Directors on March 23, 2017.

### Basis of Measurement

These Financial Statements have been prepared on the historical cost basis with the exception of cash and commodity price contracts which are measured at fair value with the changes in their fair values recorded in net loss. The methods used to measure fair values are discussed in note 3.

## Functional and Presentation Currency

These Financial Statements and the notes thereto are presented in thousands of Canadian dollars, unless otherwise noted. Chinook's functional currency is the Canadian dollar.

## Management Judgments and Estimation Uncertainty

The preparation of these Financial Statements requires management judgments and estimation uncertainty that affect the reported amounts at the date of these Financial Statements of assets, liabilities, shareholders' equity, revenues and expenses in addition to the disclosure of contingencies. Actual results could differ from those estimated. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future years affected.

Judgments that management has made through applying accounting policies that have the most significant effect on the Financial Statements are discussed below:

### *Cash Generating Units*

Cash Generating Units ("CGUs") are defined as the lowest grouping of integrated assets that generate identifiable cash inflows that are largely independent of the cash inflows of other assets or groups of assets. The classification of assets into CGUs requires significant judgment and interpretations with respect to the integration between assets, the existence of active markets, external users, shared infrastructures and the way in which management monitors Chinook's operations.

### *Impairment indicators*

Judgments are required to assess when impairment indicators exist and impairment testing is required. When assessing the recoverability of petroleum and natural gas properties, each CGU's carrying value is compared to its recoverable amount, defined as the greater of its fair value less cost to sell and value in use. In determining the recoverable amount of assets, in the absence of quoted market prices or observed market transactions, impairment tests are based on reserve estimates, market value of undeveloped lands and other relevant assumptions.

Key estimates that management has made that affect the measurement of balances and transactions in the Financial Statements:

### *Reserve estimates*

Petroleum and natural gas reserves are used in the calculation of depletion, impairment and impairment reversals. Reserve estimates and their resulting cash flows are based on engineering data, probability assessments of reserve recoveries, future prices and costs, future production rates, discount rates and the timing and extent of future capital expenditures, all of which are subject to many uncertainties and interpretation. Management expects that over time Chinook's reserve estimates will be revised, either upward or downward, based on updated information such as the results of future drilling, production costs, testing and production levels and changes to forward petroleum and natural gas prices.

### *Decommissioning obligation*

Decommissioning obligations are recognized for the future decommissioning and restoration of property, plant and equipment. These obligations are based on current legal and constructive requirements, technology, price levels and expected plans for remediation. Actual costs and cash outflows can differ from estimates because of changes in laws and regulations, public expectations, market conditions, discovery and analysis of site conditions and changes in technology. The expected timing of future decommissioning and restoration may change due to certain factors, including reserve life. Changes to assumptions related to future expected costs, discount rates and timing may have a material impact on the amounts presented.

### *Deferred taxes*

Tax interpretations, regulations and legislation in the jurisdiction in which Chinook operates are subject to change. The deferred tax asset and/or liability is based on estimates as to the timing of the reversal of temporary differences, substantively enacted tax rates and the likelihood of assets being realized from future taxable earnings.

### 3. Summary of Accounting Policies

#### Basis of Consolidation

##### *Subsidiaries:*

Subsidiaries are entities controlled by Chinook. Chinook controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the Financial Statements from the date that control commences until the date that control ceases.

##### *Joint Arrangements:*

Chinook conducts many of its petroleum and natural gas production activities through joint operations and the Financial Statements reflect only its proportionate interest in such operations. Contractual arrangements for Chinook's jointly controlled operations, whereby it does not have a 100% working interest, govern that the partners have rights to the assets and obligations for the liabilities. It is possible that at some future date allocation adjustments to revenues or expenditures could result from revised billings, audit or litigation with these other participants. Where the final outcome of these matters is different from the amounts initially recorded, such differences will affect the revenue or expenditures in the period in which such determination is made. Chinook does not have any joint venture arrangements.

##### *Transactions eliminated on consolidation:*

Intercompany balances and transactions are eliminated in preparing the Financial Statements.

#### Cash

Cash and cash equivalents are comprised of cash and short-term investments that are highly liquid in nature and have a maturity date of 90 days from the date of purchase.

#### Financial Instruments

Financial assets and liabilities are initially measured at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Initial determination and subsequent measurements of fair values are described below:

##### *Held to maturity loans and receivables and other financial liabilities:*

Chinook classifies accounts receivable as loans and receivables and accounts payable and accrued liabilities and debt as other financial liabilities.

##### *Initial determination of fair values*

The fair value of these financial instruments' classification is estimated using the present value of future cash flows, discounted at the market rate of interest at the reporting date. Attributable transaction costs incurred on initially acquiring these financial instruments are included in the recognized amount of the related financial instrument and are reported over that instrument's life using the effective interest rate method.

##### *Subsequent determination of fair value*

These financial instruments are subsequently measured at amortized cost using the effective interest method.

##### *Fair value through profit or loss:*

Chinook's commodity price contracts, in addition to cash, restricted cash and third party notes, are classified as fair value through profit and loss.

### *Initial determination of fair values*

The fair value of each commodity price contract is determined by discounting the difference between the contracted price and the published forward price curve as at the reporting date, using the remaining contracted crude oil or natural gas notional volumes at a risk-free interest rate (based on published government rates). The fair value of commodity price contracts contractually combined into costless collars is based on option models that use published information with respect to volatility, prices and interest rates.

The fair value of cash and restricted cash approximates its carrying amount.

### *Subsequent determination of fair value*

Financial instruments designated as fair value through profit and loss are subsequently measured at fair value using the same methodology as initially used to measure their fair values with any changes charged immediately to earnings.

### *Inputs*

Chinook classifies these financial instruments according to the following hierarchy on the basis of the lowest level observable input that is significant to the fair value measurement of each instrument in its entirety:

- Level 1 – Quoted prices are available in active markets for identical financial instruments as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2 – Pricing inputs are other than quoted prices in active markets included in level 1. Prices in level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace.
- Level 3 – Valuations in this level are those with inputs that are not based on observable market data.

## **Exploration and Evaluation Assets (“E&E Assets”)**

### *Exploration and evaluation expenditures*

Exploration and evaluation expenditures are initially capitalized within E&E Assets until the technical feasibility and commercial viability of the project has been determined. Such exploration and evaluation expenditures may include undeveloped land license acquisitions, exploration drilling and testing and directly attributable general and administrative costs. Expenditures incurred prior to obtaining the legal right to explore are expensed as incurred. All other exploration and evaluation expenses, including geological, geophysical and annual lease costs for undeveloped lands, are expensed as incurred.

### *Amortization*

Undeveloped land license acquisition costs for continuing operations are amortized over a term of ten years, which is based on the license term assuming capital requirements are met. All other E&E Assets are not amortized.

### *Impairment*

E&E Asset expenditures are accumulated by well and are carried forward until the existence of commercial reserves are established. Chinook defines commercial reserves as the existence of proved and probable reserves which are determined to be technically feasible and commercially viable to extract. On discovering commercial reserves, the specific exploration and evaluation expenditures are tested for impairment. The carrying value, after any impairment loss, of the relevant exploration and evaluation expenditures are then reclassified as developed and producing assets. If specific exploration and evaluation expenditures, or a portion thereof, are determined to be unsuccessful, the relevant costs are charged through exploration and evaluation expense.

In the absence of establishing commercial reserves, E&E Assets are assessed for impairment at the operating segment level. These assets are assessed for impairment if:

- Sufficient data exists to determine technical feasibility and commercial viability; and
- Facts and circumstances suggest that the carrying amount exceeds the recoverable amount.

## Development and Production Assets (“D&P Assets”)

D&P Assets, which include petroleum and natural gas development and production assets, in addition to administrative assets, are measured at cost less accumulated depletion and impairment. These costs are accumulated on an area-by-area basis and represent the cost of developing commercial reserves and bringing them into production, together with the exploration and evaluation expenditures incurred in finding commercial reserves transferred from E&E Assets as outlined above.

### *Development and production expenditures*

Costs incurred subsequent to the determination of technical feasibility and commercial viability and the costs of replacing parts are recognized as D&P Assets only when they are expected to increase the future economic benefits embodied in the specific asset to which they relate. All other expenditures, including costs of the day-to-day servicing of such assets, are expensed as incurred. Such capitalized costs generally represent expenditures incurred in the development of proved undeveloped or probable reserves in addition to enhancing production from proved producing reserves.

### *Depletion*

D&P Assets with similar useful lives are grouped together for the purposes of performing depletion calculations. Depletion expense is calculated on the unit-of-production basis based on:

- Total estimated proved plus probable reserves calculated in accordance with National Instrument 51-101, Standards of Disclosure for Oil and Gas Activities;
- Total capitalized costs plus estimated future development costs of proved plus probable reserves, which are reviewed annually by an independent reserve engineer; and
- Relative volumes of petroleum and natural gas reserves and production, before royalties, converted at the energy equivalent conversion ratio of six thousand cubic feet of natural gas to one barrel of crude oil.

Management reviews these estimates, and changes, if any, are prospectively applied.

### *Impairment or reversal of previously reported impairment*

Chinook's D&P Assets are grouped into CGUs for the purpose of assessing impairment or recovery of prior periods' reported impairments. An impairment test is performed whenever events and circumstances arising during the development and production phase indicate that the carrying value of a CGU may exceed its recoverable amount. On a CGU basis, each carrying amount is compared against its expected recoverable amount, defined as the greater of fair value less costs to sell or its value in use. Fair value less costs to sell is determined as the amount that would be obtained for the sale of a CGU in an arm's length transaction between knowledgeable and willing parties. Fair value less costs to sell of a CGU can also be determined by using assumptions that an independent market participant may take into account. This evaluation could use discounted future net cash flows of proved and probable reserves using forecast prices and costs including the development of prospective lands. Chinook's management determines fair value in use for each CGU by estimating the present value of future net cash flows from continued production through exploitation of its proved and probable reserves. Management applies a present value to these cash flows using a discount rate range depending on the category of reserves being discounted. When it is determined that any CGU's carrying value exceeds its recoverable amount, that CGU is considered impaired and an impairment expense is reported that equals this excess.

If there are indicators that a previously recognized impairment charge may no longer be valid, the recoverable amount of the relevant CGU is determined and compared against its carrying amount. An impairment charge is reversed to the extent that the CGU's carrying amount does not exceed the value that would have been determined, net of depletion, if no impairment loss had been recognized.

### *Capitalized overhead costs*

Overhead costs which are directly attributable to bringing an asset to the location and condition necessary for it to be capable of use in the manner intended by management are capitalized. These costs include directly attributable compensation costs paid to Chinook personnel.

## Held for Sale

Assets and their associated liabilities are classified as “assets and liabilities held for sale” if their carrying amounts will be recovered through sale transactions rather than through their continued use. Assets held for sale are measured at the lower of their carrying amounts and fair value less costs to sell and presented as current on the consolidated statements of financial position. Conditions which must be met in order to classify an asset as held for sale are:

- The sale is highly probable;
- The asset is available for immediate sale in its present condition;
- Management must be committed to a plan to sell;
- The sale should be expected to take place within one year of the date of classification as held for sale.

Assets held for sale are not depleted or amortized.

## Business Combinations

The acquisition method of accounting is used to account for acquisitions of subsidiaries or assets that meet the IFRS definition of a business. Determination if an acquisition meets the IFRS definition requires judgment and is assessed on a case by case basis. Identifiable assets acquired and liabilities assumed in a business combination are initially measured at their acquisition date fair values. Any excess cost over the fair value of the acquired identifiable net assets is recorded as goodwill. If the cost is less than the fair value of the acquired identifiable net assets, the difference is immediately recognized in the consolidated statements of operations and comprehensive loss. Transaction costs that Chinook incurs in connection with a business combination are expensed as incurred.

## Decommissioning Obligation

Chinook recognizes a decommissioning obligation in the period in which it has a present legal or constructive liability and a reasonable estimate of the amount can be made. On a periodic basis, management reviews these estimates, and changes, if any, are prospectively applied. The decommissioning obligation is recorded as a liability, with a corresponding increase to the carrying amount of the related asset. The capitalized amount is depleted on a unit-of-production basis over the life of the associated proved plus probable reserves. Periodic revisions to the liability specific discount rates, estimated timing of cash flows and/or to the original estimated undiscounted costs can also result in change to the decommissioning obligation. The decommissioning obligation is increased each reporting period with the passage of time as reported in accretion expense and changes in the estimated future cash flows are capitalized. Actual costs incurred upon settlement of the obligation are recorded against the decommissioning obligation.

## Deferred Taxes

Deferred tax is recognized by providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been substantively enacted by the balance sheet date.

Deferred tax assets are not recognized unless it is probable that taxable profits will be available against which the deductible temporary differences can be utilized. Deferred tax assets and tax liabilities are offset to the extent there is a legally enforceable right to offset the recognized amounts and the intent is to either settle on a net basis or to simultaneously realize the asset and settle the liability.

Deferred income tax expense is recognized in the consolidated statements of operations and comprehensive loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

## Share Capital

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares, share options, and share awards are recognized as a deduction from equity, net of any tax effects.

## Revenue Recognition

Revenue from the sale of petroleum and natural gas produced by Chinook is recognized when title is transferred from Chinook to its customers. Revenue is measured at the fair value of the consideration received or receivable.

This revenue is recognized when all of the following conditions have been satisfied:

- Chinook has transferred the significant risks and rewards of ownership of the production to the buyer which usually occurs at the time petroleum or natural gas passes through a terminal point;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to Chinook; and
- The costs incurred or to be incurred in respect of the transaction can be reliably measured.

## Share-based Compensation

Chinook has the following two types of share-based incentive plans pursuant to which, share awards and share options may be granted to directors, officers, employees and other service providers of Chinook:

### *Share award incentive plan*

The Company has a restricted and performance award incentive plan (the "Share Award Incentive Plan"). Chinook began to grant restricted awards (RSUs) and performance awards (PSUs) on June 26, 2014. Subject to the terms and conditions of the Share Award Incentive Plan, restricted awards and performance awards will entitle the holder to a sum (the "Award Value") to be paid in equal tranches on the first and second anniversaries of the date of grant (the "Payment Date") of such restricted awards or performance awards, as applicable.

On the applicable Payment Date, Chinook, at its sole and absolute discretion, shall have the option of settling the Award Value to which a holder of restricted awards or performance awards is entitled in the form of either cash or in common shares which may either be acquired by Chinook on the stock exchange on which the common shares may be listed from time to time or issued from the treasury of Chinook, or some combination thereof. Chinook's current non-binding intention is to settle the Award Value in common shares and it has therefore accounted for the fair value of the restricted awards and performance awards as though they will be equity-settled. Provided Chinook maintains this intention and settles the Award Value through the issuance of common shares, it will continue to account for the restricted awards and performance awards as equity-settled throughout their vesting period. The fair value of the restricted awards and performance awards is determined as of their grant date based on the market price of Chinook's common shares adjusted for an estimated forfeiture rate.

The fair value of the performance awards is further adjusted by an estimated payout multiplier. Share-based compensation expense is recorded over the period that the restricted awards and performance awards vest, with a corresponding increase to contributed surplus, on the basis that the award is expected to be equity settled. Forfeitures are re-estimated throughout the vesting period based on past experience and future expectations with a final adjustment upon actual vesting. The expected life of these granted awards is adjusted based on Chinook's best estimate for the effects of non-transferability and exercise restrictions. When either the restricted awards or performance awards vest they are immediately settled, at which time the related fair value amounts previously recorded in contributed surplus are reclassified to share capital.

In the case of restricted awards, the Award Value is calculated at the Payment Date(s) by multiplying the number of restricted awards by the fair market value of the Chinook common shares. The fair market value is determined on the applicable Payment Date as the volume weighted average trading price of the common shares on the Toronto Stock Exchange (or other stock exchange on which the common shares may be listed) for the five trading days immediately preceding such date.

With respect to performance awards, on each Payment Date, or such other dates as may be determined by the Compensation, Nominating and Corporate Governance Committee (the "Committee") of the Board of Directors, the holder will be entitled to an amount equal to one-half of the Award Value underlying such performance awards multiplied by a payout multiplier. The payout multiplier is determined by the Committee based on an assessment of the achievement of the pre-defined corporate performance measures in respect of the applicable period. The payout multiplier for a particular period can range from one-half to two depending on the point within the target range that Chinook satisfies the corporate performance measures. Annually, prior to the Payment Date in respect of any performance award, the Committee assesses the performance of Chinook for the applicable period.

When a restricted award or performance award vests on a Payment Date, it is immediately settled by Chinook. As a result, the reported outstanding awards will always be unvested.

## *Share option plan*

Share options granted pursuant to Chinook's share option plan are intended to be settled through the issuance of common shares from treasury of Chinook. The fair value of share options is determined on their grant date using the Black-Scholes option pricing model. Share-based compensation expense is recorded over the period that the share options vest, with a corresponding increase to contributed surplus. Forfeitures are re-estimated throughout the vesting period based on past experience and future expectations with a final adjustment upon actual vesting. When share options are exercised, the proceeds, together with the amounts recorded in contributed surplus, are recorded in share capital. The cashless exercise of share options results in a portion of the optionee's share options being forfeited in consideration for the share option exercise price. Upon exercise, the consideration received plus the amount previously recorded as contributed surplus are recognized as share capital.

## **Gains or Losses on Disposition of Properties**

Gains and losses on the disposition of properties are determined by comparing the proceeds from each sale with the specific E&E and/or D&P Assets' carrying amounts and disposed decommissioning obligations.

Exchanges of properties are measured at fair value unless the exchange transaction lacks commercial substance or the fair value of neither the asset received nor the asset given up is reliably measurable. The cost of the acquired property is measured at the fair value of the property given up, unless the fair value of the property received is more clearly evident. Chinook will report a gain or loss equal to the difference between the fair value determined for the property acquired relative to the carrying amount of the property given up.

## **Earnings (Loss) per Share**

Basic earnings (loss) per share is calculated by dividing the net earnings or loss attributable to Chinook's common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per share is determined by the same calculation as basic earnings (loss) per share except diluted earnings per share includes the weighted average number of common shares outstanding during the period for the dilutive effects of outstanding options, RSUs and PSUs at the end of the reporting period.

# **4. New Accounting Standards and Amendments**

## **New Accounting Standards Not Yet Adopted**

In July 2014, the IASB issued IFRS 9 "Financial Instruments" to replace IAS 39, "Financial Instruments Recognition and Measurement". The new standard replaces the current multiple classification and measurement models for financial instruments with a single model that has only two classification categories: amortized cost and fair value. Chinook is currently assessing the impact of this standard.

In May 2014, the IASB issued IFRS 15 "Revenue from Contracts with Customers" to replace International Accounting Standard ("IAS") 18, Revenue, IAS 11 "Construction Contracts", and related interpretations. The standard contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which affect the amount and/or timing of revenue recognized. Chinook is currently assessing the impact of this standard.

As of January 1, 2018, Chinook will be required to adopt the above two standards.

In January 2016, the IASB issued IFRS 16 "Leases". The standard requires entities to recognize lease assets and lease obligations on the statement of financial position. For lessees, there will be a single lease accounting model for all leases, there will no longer be a classification test between finance and operating leases. The lessee will recognize a Right of Use ("ROU") asset and a lease liability, and the lease will be treated as an asset on a financed basis. There will be an optional exemption from the above for short term leases and leases of low value assets, defined at 12 months or less and an option for portfolio accounting on leases that have similar criteria. From the lessor's perspective, there will still be a dual lease accounting model, that follows the criteria set out in IAS 17. As of January 1, 2019, Chinook will be required to adopt this standard. Chinook is currently assessing all major leases including firm commitment contracts, which are expensed as operating leases for reclassification to the statement of financial position.

## 5. Business Acquisition

On the Closing Date, CEI completed the acquisition of 70% of Tournament's (now Craft) issued and outstanding common shares, pursuant to the PSA dated and effective May 1, 2016. In consideration for 70% of the issued and outstanding common shares, CEI transferred the Subject Assets to Craft. The purpose of this business acquisition was to consolidate similar Alberta non-Montney properties with sufficient associated reserves to attract additional financing and have a management team focused on the development of these properties. This business acquisition has been prepared in accordance with the acquisition method as disclosed in note 3.

Concurrent with CEI's contribution of the Subject Assets to Craft, WOGH Limited Partnership ("WOGH") contributed producing and undeveloped properties in similar areas net of associated decommissioning obligations and cash to acquire 10% of Craft's issued and outstanding common shares pursuant to the PSA. WOGH is a partnership principally managed by Alberta Investment Management Corporation, a related party to Chinook. As the issuance of Craft's common shares to CEI and WOGH was evaluated on the fair value of contributed net assets of each transacting party relative to the total fair value, CEI sequenced this business acquisition to already include WOGH's contribution of net assets. As a result, the fair value of net assets acquired by CEI includes both of those contributed from Craft and WOGH.

### Fair Value of Craft's Net Assets

Since Craft was a private company and the fair value of this company's common shares was not available from transparent market transactions, Chinook evaluated the fair value of Craft's net assets as at the Closing Date. This evaluation included the agreed upon consideration for those properties and associated decommissioning obligations. The details of the fair value amounts of Craft's net assets as at the Closing Date were evaluated as follows:

*Development & production assets:* this fair value was approximated using an internally prepared reserve evaluation. This evaluation uses future net cash flows anticipated to be produced from Craft's proved developed producing reserves and the selling price obtained on its October 2016 disposition of certain properties.

*Exploration & evaluation assets:* this fair value was approximated using recent market sales transactions of similar undeveloped lands in the immediate surrounding areas.

*Decommissioning obligations:* this fair value was determined using the timing and estimated costs associated with the abandonment, restoration and reclamation of proved developed wells and infrastructure and then present valued using a market discount rate.

*Debt:* this fair value was determined to approximate the outstanding principal amount.

*Other financial instruments:* the carrying values of other financial instruments approximate their fair values.

*Non-controlling interest:* the above fair value measures were used to calculate the Closing Date fair value of the 30% non-controlling interest in Craft.

### CEI's Consideration

As Chinook maintained control over the Subject Assets transferred to Craft after this acquisition, it continued to measure the Subject Assets at the same carrying amounts immediately prior to and after the acquisition. This resulted in the Subject Assets' carrying value at the Closing Date being used to determine the 30% non-controlling interest. An evaluation of the fair value of the D&P assets' component of the Subject Assets revealed that their fair value less costs to sell was less than their carrying amount. As a result, Chinook adjusted for the non-controlling interest portion of this loss through an adjustment to equity of \$25.4 million.

## Business Combination

A summary of the business combination is as follows:

	June 10, 2016
<b>Estimated fair value of net assets acquired:</b>	
Cash	\$ 867
Non-cash working capital	1,214
Development and production assets (note 7)	23,600
Exploration and evaluation assets (note 8)	1,300
Bank debt (note 12)	(17,793)
Decommissioning obligation (note 11)	(3,977)
Non-controlling interest	(1,563)
	<b>\$ 3,648</b>
<b>Estimated consideration:</b>	
Non-controlling interest in the carrying value of the Subject Assets	\$ 29,066
Equity loss	(25,418)
	<b>\$ 3,648</b>

D&P Assets of \$17.0 million and \$6.6 million were contributed by Craft and WOGH, respectively. Since June 10, 2016, included in Chinook's year ended December 31, 2016 consolidated statements of operations and comprehensive loss is approximately \$5.0 million of petroleum and natural gas revenue and a \$0.4 million net loss recognized from Craft's petroleum and natural gas production. These measures exclude the operating results from the Subject Assets since the Closing Date. Had this business acquisition been effective January 1, 2016, management estimates the approximate consolidated pro forma revenues and net losses at \$44 million and \$80 million, respectively, for period ended December 12, 2016.

### Net Loss Attributable to Non-controlling Interest

The net loss of Craft from June 10, 2016 to December 12, 2016 resulted in a net loss attributable to the non-controlling interest of \$20.6 million.

## 6. Distribution of Craft Shares to Chinook Shareholders

To measure the distribution of Craft shares, management estimated the fair value of each line item that comprised Craft's net assets as at December 12, 2016. Subsequent to December 12, 2016, Craft entered into purchase and sale agreements to dispose of substantially all of its petroleum and natural gas properties. The selling price in these agreements was used as a basis to estimate the fair value of Craft's petroleum and natural gas properties, net of decommissioning obligations. An additional impairment charge of \$6.1 million on the Craft properties was recognized.

A summary of the estimated fair value of Craft's net assets distributed to Chinook's shareholders as at December 12, 2016 is as follows:

	December 12, 2016
<b>Estimated fair value of Craft's net assets distributed to Chinook's shareholders:</b>	
Cash	\$ 8,220
Non-cash working capital, excluding the fair value of commodity price contracts and third party warrants	(711)
Commodity price contracts and third party warrants	(4,254)
Bank debt	(6,287)
Development & production and exploration & evaluation assets, net of decommissioning obligation	37,003
Non-controlling interest	(10,004)
	<b>\$ 23,967</b>

Craft's cash was assessed on the fair value hierarchy as level 1 as it is transacted in active markets. Craft's commodity price contracts and the third party warrants were assessed as level 2 (see note 9).

Chinook recognized the fair value of the Craft shares it distributed to Chinook shareholders through a charge directly to Chinook's deficit of \$24.0 million.

## Transaction and distribution costs

Transaction and distribution costs incurred on the acquisition of Craft (see note 5) and the Craft Share Distribution include legal and other professional fees in addition to CEI severance costs. These costs of \$3.2 million for the year ended December 31, 2016 have been expensed on the consolidated statements of operations and comprehensive loss.

## 7. Development and Production Assets

The following table reconciles Chinook's D&P Assets for the years ended December 31, 2016 and 2015:

<b>Cost of Assets</b>	<b>2016</b>	<b>2015</b>
<b>Beginning balance</b>	<b>\$ 719,199</b>	<b>\$ 694,361</b>
Capital expenditures	9,047	41,975
Business acquisition non-cash consideration (note 5)	23,600	-
Business acquisition cash consideration	-	658
Removed on distribution of Craft shares (note 6)	(384,293)	-
Cost of properties sold (note 9)	(135,430)	(24,019)
Assets held for sale (note 10)	(6,397)	-
Transfer from exploration & evaluation assets (note 8)	300	3,436
Decommissioning asset additions and change in estimates (note 11)	11,842	2,788
<b>Ending balance</b>	<b>\$ 237,868</b>	<b>\$ 719,199</b>
<b>Accumulated Depletion &amp; Depreciation</b>		
<b>Beginning balance</b>	<b>\$ (473,163)</b>	<b>\$ (385,144)</b>
Depletion & depreciation	(21,911)	(28,843)
Impairment	(57,780)	(75,000)
Reversal of prior years' impairment	17,000	-
Removed on distribution of Craft shares (note 6)	311,878	-
Reversed on sale of properties (note 9)	74,858	15,824
Reversed on assets held for sale (note 10)	4,209	-
<b>Ending balance</b>	<b>\$ (144,909)</b>	<b>\$ (473,163)</b>
<b>Net book values</b>	<b>\$ 92,959</b>	<b>\$ 246,036</b>

Chinook capitalized \$1.0 million and \$1.4 million of direct general and administrative costs related to its development activity during the years ended December 31, 2016 and 2015, respectively.

## Evaluation of composition of CGUs

Management reviewed and adjusted its CGUs as a result of changes to both Chinook's property mix achieved through core area development, significant property dispositions and the distribution of Craft shares to Chinook's shareholders on December 12, 2016. Chinook's petroleum and natural gas properties are located in the Peace River Arch area with a commodity mix weighted to natural gas and its associated liquids. Management concluded that Chinook had one CGU, the Peace Arch River area, as at December 31, 2016.

## Impairment of D&P Assets

Management compared the consideration received on a disposition of certain of Craft's properties in October 2016 and concluded that this was evidence that there was a decrease in the fair value of the Subject Assets. This evidence warranted conducting an impairment test on the Craft CGU's carrying value. As the consideration received in October 2016 approximated the future net cash flows anticipated to be produced from proved developed producing reserves, using a before income tax discount rate of 15 percent and forward commodity price estimates, management applied these same metrics to estimate the fair value less costs to sell of the Craft CGU. This estimate resulted in an impairment charge of \$52 million.

The September 30, 2016, proved producing reserves of the Craft CGU were estimated internally by management based on a December 31, 2015 independent reserve report and operational events to September 30, 2016.

The calculation of the Craft CGU's fair value less costs to sell used the following forward commodity prices, as estimated by management, at September 30, 2016:

<b>As at September 30, 2016</b>	<b>Edmonton light (\$/bbl)</b>	<b>AECO Gas (\$/mmbtu)</b>
2016 (3 months)	\$ 50.74	\$ 2.56
2017	\$ 66.40	\$ 3.20
2018	\$ 72.80	\$ 3.55
2019	\$ 80.90	\$ 3.85
2020	\$ 83.20	\$ 3.95
Thereafter	1.94% to 2.07%/yr	1.6% to 3.77%/yr

A five percent decrease in the forward commodity price estimate or a one percent increase in the applied discount rate, as determined for the Craft CGU, would have resulted in an additional impairment charge totaling approximately \$10 million and \$2 million, respectively.

## Reversal of Prior Years' Impairment of D&P Assets

As at December 31, 2016, management observed evidence that warranted a test for impairment or recovery of the one remaining CGU's carrying value relative to its recoverable value. The recoverable amount was determined to be fair value less cost to sell, and was estimated to be \$93.0 million as at December 31, 2016. As the Peace River Arch CGU's recoverable amount was higher than its carrying value, this resulted in a \$17.0 million reversal of prior years' impairment expense.

The Peace River Arch CGU's recoverable value was based on a December 31, 2016, independently prepared reserve report. Management used this report to calculate expected future net cash flows anticipated to be produced from the combined reserve categories proved developed producing, non-producing/undeveloped and probable using before income tax discount rates of 15%, 20% and 30%, as respectively applied to each reserve category, in addition to the following January 1, 2017 forward commodity price estimates (and the comparatives):

<b>As at December 31,</b>	<b>Edmonton Light Crude Oil (\$/bbl) <sup>(1)</sup></b>			<b>AECO Gas (\$/mmbtu) <sup>(2)</sup></b>	
		<b>2016 <sup>(3)</sup></b>	<b>2015 <sup>(3)</sup></b>	<b>2016 <sup>(3)</sup></b>	<b>2015 <sup>(3)</sup></b>
2017	\$	69.80	\$ 66.40	\$ 3.40	\$ 3.20
2018	\$	72.70	\$ 72.80	\$ 3.15	\$ 3.55
2019	\$	75.50	\$ 80.90	\$ 3.30	\$ 3.85
2020	\$	81.10	\$ 83.20	\$ 3.60	\$ 3.95
2021	\$	86.60	\$ 88.20	\$ 3.90	\$ 4.20
Thereafter		2%	2%	2%	2%

(1) Central market point for Canadian crude oil.

(2) Central market point for Canadian natural gas.

(3) Source: McDaniel & Associates Consultants Ltd. price forecast, effective January 1, 2017 and 2016.

A five percent decrease in the forward commodity price estimate or a one percent increase in the applied discount rate, as determined for Chinook's one remaining CGU, would have resulted in a decrease in the reversal of prior years' impairment expense totaling approximately \$10.7 million and \$2.9 million, respectively.

## Impairment of D&P Assets and E&E Assets, Net of Reversal

For the period from June 10, 2016 to December 12, 2016, the impairment expense against both of Craft's D&P Assets and its E&E Assets was \$58.1 million. Combined with the \$17.0 million reversal of prior years' impairment expense from Chinook's one remaining CGU, the impairment of D&P Assets and E&E assets, net of reversal, for the year ended December 31, 2016, as reported on the consolidated statements of operations and comprehensive loss, was \$41.1 million (for the year ended December 31, 2015, impairment expense of \$75.0 million).

## 8. Exploration & Evaluation Assets

The following table reconciles Chinook's E&E Assets for the year ended December 31, 2016 and 2015:

<b>Cost of Assets</b>	<b>2016</b>	<b>2015</b>
<b>Beginning balance</b>	<b>\$ 68,622</b>	<b>\$ 69,168</b>
Capital expenditures	164	2,350
Business acquisition non-cash consideration (note 5)	1,300	-
Removed on distribution of Craft shares (note 6)	(30,346)	-
Cost of properties sold/swapped (note 9)	(3,037)	(1,441)
Assets held for sale (note 10)	(5,456)	-
Fair value of property swaps (note 9)	-	1,981
Transfer to development & production assets (note 7)	(300)	(3,436)
<b>Ending balance</b>	<b>\$ 30,947</b>	<b>\$ 68,622</b>
<b>Accumulated Amortization</b>		
<b>Beginning balance</b>	<b>\$ (44,315)</b>	<b>\$ (41,791)</b>
Impairment of Craft properties (note 7)	(320)	-
Amortization	(3,738)	(3,665)
Removed on distribution of Craft shares (note 6)	27,725	-
Properties sold/swapped (note 9)	2,717	1,141
Reversed on assets held for sale (note 10)	496	-
<b>Ending balance</b>	<b>\$ (17,435)</b>	<b>\$ (44,315)</b>
<b>Net book values</b>	<b>\$ 13,512</b>	<b>\$ 24,307</b>

During the year ended December 31, 2016, pre-licensing evaluation, exploratory lease rental and geological and geophysical costs of \$0.7 million were expensed through the line item "exploration and evaluation" on the consolidated statements of operations and comprehensive loss (December 31, 2015 - \$1.6 million).

As discussed in note 7, management attributed \$0.3 million of impairment to the Craft E&E Assets as at December 12, 2016.

During the years ended December 31, 2016 and 2015, Chinook did not identify facts and circumstances that indicated impairment in the carrying value of exploration and evaluation assets. As at December 31, 2016, Chinook's exploration properties, excluding those held for sale (see note 10), are prospective for the Montney formation as located in the Peace River Arch area.

## 9. Property Dispositions

During the year ended December 31, 2016, Chinook completed the sale of several petroleum and natural gas properties including undeveloped lands and other adjustments for aggregate net proceeds of \$21.4 million (\$42.8 million for the year ended December 31, 2015). The carrying amount of these sold properties, less \$45.3 million of associated decommissioning obligations (\$9.4 million for the year ended December 31, 2015), was less than the sales proceeds received. This contributed to the gain on dispositions of properties of \$5.8 million for the year ended December 31, 2016 (\$23.3 million for the year ended December 31, 2015).

In October 2016, Craft disposed of properties with a net carrying amount of \$13.5 million for equivalent proceeds. Consideration that Craft received for this disposition included \$4.5 million of the buyer's units (the "Units"). The Units were comprised of par value 10.5% senior secured notes (the "Notes") due in 2021 and 7.38 million purchase warrants (the "Warrants"). Each Warrant entitles the holder to acquire one common share of the buyer at a price of \$0.18 per share. The Warrants expire November 15, 2021. Chinook management bifurcated the value of the Units between the Notes and the Warrants. The fair value of the Warrants was estimated using received bids. The fair value of the Notes was determined from the face value of the Units less the estimated fair value of the Warrants. Management's fair value estimates for the Notes and Warrants was \$4.2 million and \$0.3 million, respectively. The Units fair value estimate was assessed on the fair value hierarchy as level 1 as these Units transacted in active markets. The bifurcated fair value of the Units between the Notes and Warrants were assessed on the fair value hierarchy as level 2.

In November 2016, Craft management sold the Notes for \$3.6 million. This resulted in a realized loss on the sale of \$0.6 million.

## 10. Assets Held for Sale

During December 2016, Chinook entered into two agreements to sell certain of its petroleum and natural gas properties and undeveloped lands located in the Knopcik/Pipestone and East Gold Creek areas of northwestern Alberta for total net proceeds of \$18.0 million before customary adjustments. At December 31, 2016, these properties were classified as held for sale as it was highly probable that their carrying values would be received through a sales transaction rather than through continued use. These transactions closed on January 20, 2017 and February 1, 2017, respectively.

The combined net carrying values of \$7.2 million were reclassified from D&P Assets and E&E Assets to assets held for sale and the associated decommissioning obligations of \$0.2 million were reclassified from provisions to liabilities held for sale on the consolidated statements of financial position.

## 11. Provisions

The total future decommissioning obligations were estimated by management based on Chinook's net ownership interest in all wells and facilities, estimated costs to reclaim and abandon the wells and facilities and the estimated timing of the costs to be incurred in future periods. At December 31, 2016, Chinook has estimated the net present value of its total decommissioning obligation based on a total future undiscounted liability of \$31.5 million including \$0.3 million of liabilities held for sale (\$99.5 million - December 31, 2015). At December 31, 2016, management estimates that these payments are expected to be made over an average of 25 years (December 31, 2015 – 18 years). At December 31, 2016, a risk free rate of 2.34% and an inflation rate of 2.0% were used to calculate the present values of the decommissioning obligations (December 31, 2015 – 2.16% and 2.0%, respectively).

The following table reconciles Chinook's provisions for the year ended December 31, 2016 and 2015:

	2016	2015
<b>Beginning balance</b>	<b>\$ 98,742</b>	<b>\$ 106,726</b>
Business acquisition (note 5)	3,977	-
Decommissioning obligation additions and change in estimate	11,618	2,788
Property dispositions (note 9)	(45,278)	(9,360)
Decommissioning obligation and other expenditures	(3,914)	(3,888)
Accretion expense	2,192	2,476
Liabilities held for sale (note 10)	(236)	-
Removed on distribution of Craft shares (note 6)	(38,034)	-
<b>Total provisions</b>	<b>\$ 29,067</b>	<b>\$ 98,742</b>

As reported on the consolidated statements of financial position, Chinook's provision balance consists of:

	2016	2015
Short-term portion of provisions	\$ 1,300	\$ 2,700
Long-term portion of provisions	27,767	96,042
<b>Total provisions</b>	<b>\$ 29,067</b>	<b>\$ 98,742</b>

The business acquisition addition of \$4.0 million was the fair value estimate of Craft's decommissioning obligations at the date of acquisition. This was immediately followed by a \$15.2 million change in estimate for these same obligations caused by applying risk-free discount rates from the credit adjusted risk-free rates used to measure fair value. The \$38.0 million carrying value removed on distribution of Craft shares includes the decommissioning obligations of the Subject Assets. The change in estimate decreased \$3.4 million as a result of the combined effect from an increase in the risk free discount rate, decrease in the estimated cost to abandon and reclaim wells and an increase in the expected timing of such costs, less additions for decommission obligations caused by drilling activities during the year ended December 31, 2016.

## 12. Long-Term Debt

During the year ended December 31, 2016, Chinook voluntarily reduced its reserve-based credit facility (the "Previous Credit Facility"), with a Canadian bank, from \$50.0 million to \$nil, as a result of the transfer of the Subject Assets to Craft. There were no outstanding draws at the time of this voluntary reduction in the borrowing base (undrawn with a borrowing base of \$50.0 million - December 31, 2015). The Previous Credit Facility did not include any financial covenants or reporting requirements and was collateralized by floating charges and security interests over all present and future properties and other assets of Chinook.

Subsequent to December 31, 2016, the Previous Credit Facility agreement was terminated and Chinook negotiated and secured an \$8.0 million demand credit facility (the "Demand Credit Facility") with a Canadian chartered bank. Borrowings under the Demand Credit Facility will be limited to \$2 million subject to confirmation that three wells on Chinook's Birley/Umbach properties are on production and producing to the lender's satisfaction. At any time, the lender can request repayment of all outstanding drawn amounts resulting in any future borrowings being classified as a currently liability. The Demand Credit Facility's availability is subject to annual reviews with the first review scheduled for June 1, 2017. Changes in the availability in the Demand Credit Facility are possible, from one review to the next, with draws in excess of availability becoming immediately payable. Borrowings will incur interest at the prime rate plus an applicable margin and are collateralized by floating charges and security interests over all of Chinook's present and future properties and other assets. The Demand Credit Facility has a financial covenant requiring that the adjusted working capital be 1:1 at each reporting period. For the purposes of this covenant, adjusted working capital is defined as working capital excluding both current commodity price contracts and debt. In addition, the Demand Credit Facility includes operating and financial restrictions on Chinook that include restrictions on paying dividends or repurchasing or making of other distributions with respect to Chinook's securities.

The terms of the Demand Credit Facility also require that Chinook must enter into commodity price contracts covering no less than 30% of its forecasted twelve month combined production volumes of crude oil, natural gas and natural gas liquids.

On June 10, 2016, as a result of the acquisition of Craft (see note 5), Chinook acquired outstanding debt. This debt was then disposed of on December 12, 2016. Borrowings under Craft's credit facility incurred interest at a rate equal to 9% per annum.

## 13. Income Taxes

The provision for income taxes reflects an effective tax rate which differs from the expected statutory rate. Differences were accounted for as follows:

	December 31 2016	December 31 2015
Net loss before tax	\$ (54,773)	\$ (83,606)
Expected tax rate	26.5%	26.0%
Expected income tax recovery	\$ (14,515)	\$ (21,738)
Effect on income tax resulting from:		
Stock-based compensation	594	617
Change in unrecognized tax asset	11,947	23,260
Adjustments to opening deferred tax balances	848	788
Change in enacted tax rates	1,126	(2,927)
<b>Total income tax expense</b>	<b>\$ -</b>	<b>\$ -</b>

The statutory tax rate consists of the combined federal and provincial tax rates applicable for the Company and its subsidiaries.

## Unrecognized deferred tax assets

As at December 31, 2016, Chinook had Canadian unrecognized temporary differences as follows:

	December 31 2016	December 31 2015
Development & production/exploration & evaluation assets	\$ 29,612	\$ -
Provisions	29,067	11,961
Non-capital losses	230,430	211,183
Capital losses	10,750	-
Other	2,445	2,043
	<b>\$ 302,304</b>	<b>\$ 225,187</b>

Deferred tax assets are recognized for deductible temporary differences to the extent that the realization of the related tax benefit through future taxable profits is probable. The ability to realize the tax benefits of these losses is dependent upon a number of factors, including the future profitability of operations where these temporary differences arose.

## Recognized deferred tax assets and liabilities

Deferred tax assets and liabilities were attributable to the following:

	December 31 2016	December 31 2015
Deferred tax liabilities:		
Development & production/exploration & evaluation assets	\$ -	\$ 23,269
		23,269
Less deferred tax assets:		
Provisions	-	(23,269)
Net deferred tax liability	\$ -	\$ -

Movement in deferred taxes related to temporary differences during the year ended December 31, 2016:

	December 31 2015	Recognized in statement of loss	December 31 2016
Development & production/exploration & evaluation assets	\$ 23,269	\$ (23,269)	\$ -
Provisions	(23,269)	23,269	-
	\$ -	\$ -	\$ -

Movement in deferred taxes related to temporary differences during the year ended December 31, 2015:

	December 31 2014	Recognized in statement of loss	December 31 2015
Development & production/exploration & evaluation assets	\$ 35,932	\$ (12,663)	\$ 23,269
Non-capital tax losses	(9,227)	9,227	-
Derivative contracts	370	(370)	-
Provisions	(27,075)	3,806	(23,269)
	\$ -	\$ -	\$ -

## Uncertain Tax Position

Chinook is subject to taxation in Canada and was subject to taxation in international jurisdictions. There are many transactions and calculations during the course of business for which the ultimate tax determination is uncertain. Chinook maintains provisions for uncertain tax positions that it believes appropriately reflect its risk. These provisions are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. Chinook reviews the adequacy of these provisions at the end of the reporting period. However, it is possible that at some future date, liabilities in excess of Chinook's provisions could result from audits by, or litigation with, tax authorities. Where the final outcome of these tax-related matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determination is made.

## 14. Share Capital

### Authorized:

An unlimited number of no par value common shares and first preferred shares.

### Issued and Outstanding:

#### *Common Shares*

The holders of common shares are entitled to share equally in dividends, returns of capital and to vote at shareholders' meetings.

In connection with the Craft Share Distribution, on December 12, 2016, each outstanding Chinook share was exchanged for one new class "A" common share in the capital of Chinook (which class "A" common shares were subsequently re-named common shares) and 0.70343 of a common share in the capital of Craft. All previous outstanding common shares of Chinook were deemed to have been cancelled. The Craft share amount represents the pro-rata entitlement per Chinook share to the 152,251,953 Craft shares held by

Chinook based on the 216,442,934 Chinook shares issued and outstanding as at the close of business on December 12, 2016. A new Chinook share does not have any pro-rata entitlement to a Craft share.

### First Preferred Shares

No first preferred shares have been issued.

### Per Share Amounts

The per share amounts for the years ended December 31, 2016 and 2015, were calculated as per the following table:

Year ended December 31	2016	2015
Weighted average shares outstanding - basic & diluted (thousands)	215,860	215,197
Net loss	\$ (54,773)	\$ (83,606)
Net (loss) income per share - basic & diluted (\$/share)	\$ (0.25)	\$ (0.39)

For the years ended December 31, 2016 and 2015, because Chinook reported net losses, the effect, if any, of options, RSU's and PSU's would have been anti-dilutive resulting in them being excluded in the calculation of dilutive weighted average shares outstanding.

## 15. Long-Term Incentive Plans

Chinook grants share options, restricted awards and performance awards (collectively, "Share-Based Awards") under its long-term incentive plans to employees, officers, directors, consultants and other service providers. The maximum number of common shares issuable from treasury pursuant to all Share-Based Awards may not exceed 10% of Chinook's issued and outstanding common shares.

During the year ended December 31, 2016, the settlement of 562,475 restricted awards and 501,824 performance awards resulted in the issuance of 1,093,442 common shares, after adjusting for the performance multiplier, and the transfer for the estimated fair value of these share-based awards of \$1.4 million from contributed surplus to share capital.

Share-based compensation, included in the net loss, for the years ended December 31, 2016 and 2015, was \$2.2 million and \$2.4 million, respectively.

### Share Option Plan

Outstanding options granted pursuant to Chinook's share option plan vest evenly over a period of three years and expire five years after the grant date. A summary of options outstanding is as follows:

	Number of Options (thousands)	Weighted Average Exercise Price (\$/option)
<b>Balance as at December 31, 2014</b>	<b>10,530</b>	<b>\$ 1.83</b>
Granted	4,304	\$ 0.82
Forfeited, cancelled or surrendered	(2,359)	\$ (1.75)
Expired	(3,009)	\$ (2.41)
<b>Balance as at December 31, 2015</b>	<b>9,466</b>	<b>\$ 1.21</b>
Forfeited or cancelled	(1,681)	\$ (1.22)
Expired	(1,313)	\$ (1.62)
<b>Balance as at December 31, 2016</b>	<b>6,472</b>	<b>\$ 1.13</b>

The table below summarizes the outstanding share options, their respective weighted average exercise prices and remaining life in addition to the number of outstanding exercisable options, their respective weighted average exercise prices and remaining life as at December 31, 2016.

Range of Exercise Prices (\$/option)	Outstanding Options			Outstanding Exercisable Options		
	Options Outstanding (thousands)	Weighted Average Exercise Prices (\$/option)	Weighted Average Remaining Life (years)	Options Outstanding (thousands)	Weighted Average Exercise Prices (\$/option)	Weighted Average Remaining Life (years)
\$0.54 - \$0.84	2,036	\$ 0.54	4.0	689	\$ 0.55	3.9
\$0.94 - \$1.19	1,876	\$ 1.15	2.5	1,094	\$ 1.15	2.0
\$1.22 - \$1.26	1,470	\$ 1.25	2.4	1,052	\$ 1.25	2.2
\$1.35 - \$1.74	540	\$ 1.62	0.7	493	\$ 1.64	0.5
\$2.33 - \$2.46	550	\$ 2.42	2.5	369	\$ 2.42	2.5
	<b>6,472</b>	<b>\$ 1.13</b>	<b>2.8</b>	<b>3,697</b>	<b>\$ 1.26</b>	<b>2.3</b>

There were no options granted during the year ended December 31, 2016. The following factors were used in the Black-Scholes pricing model for the determination of the fair value of options granted during the year ended December 31, 2015:

December 31	2015
Expected average life (years)	3 to 5
Risk-free interest rate (%)	0.72 to 1.22
Estimated forfeiture rate per annum (%)	12.8 to 13.1
Volatility factor (%)	52 to 60
Share option exercise price (\$/option)	0.84 to 2.09

The weighted average fair value of options granted during the year ended December 31, 2015 was \$0.36 per option.

## Share Award Incentive Plan

A summary of restricted and performance awards outstanding are as follows:

	Number of Restricted Awards (thousands)	Number of Performance Awards (thousands)
<b>Balance as at December 31, 2014</b>	207	244
Granted	1,039	940
Distributed	(96)	(117)
Forfeited	(66)	(60)
<b>Balance as at December 31, 2015</b>	<b>1,084</b>	<b>1,007</b>
Distributed	(562)	(502)
Forfeited	(173)	(123)
<b>Balance as at December 31, 2016</b>	<b>349</b>	<b>382</b>

There were no restricted or performance awards granted during the year ended December 31, 2016. The factors used to fair value the restricted award and/or performance award grants for the year ended December 31, 2015 were as follows:

Year ended December 31,	2015	
	Restricted Awards	Performance Awards
Weighted average common share trading price (\$/share)	1.21	1.25
Estimated forfeiture rate per annum (%)	12.9 to 13.1	12.9 to 13.1
Estimated performance award payout multiplier	N/A	1.0

## 16. Related Party and Significant Shareholder

Chinook has determined that its key management personnel consist of its officers and directors. In addition to the salaries and directors fees paid to the officers and directors, respectively, the officers and directors participate in Chinook's long-term incentive plans, which include the share option plan and the Share Award Incentive Plan. The officers' salaries, directors' fees and other benefits as included in general and administrative expenses for the years ended December 31, 2016 and 2015 totaled \$2.3 million and \$2.6 million, respectively. Long-term incentive benefits for Chinook's officers' and directors as included in share-based compensation for the years ended December 31, 2016 and 2015 totaled \$1.2 million and \$1.3 million, respectively.

Alberta Investment Management Corporation ("AIMCo"), as investment manager to Her Majesty the Queen in Right of the Province of Alberta ("HMQ"), maintains investment control and direction over approximately 37% of Chinook's outstanding common shares for the benefit of HMQ. Pursuant to a management and administration services agreement (the "Services Agreement") dated June 29, 2010 between WOGH GP and Chinook, WOGH GP engaged Chinook to perform its duties under the partnership agreement and to manage, administer and maintain the properties and the books, accounts and records of WOGH in connection with the partnership business and to make all decisions relating thereto. WOGH was formed to hold working interests in certain of Chinook's assets which are held by nominees of AIMCo on behalf of HMQ. As Chinook manages, administers and maintains the properties and the books, accounts and records of WOGH, the Company is reimbursed for such services. In accordance with the Services Agreement, Chinook reported a recovery from WOGH, which is reported against the Company's general and administrative expense of \$1.4 million and \$1.7 million for the years ended December 31, 2016 and 2015, respectively. The recovery for the year ended December 31, 2016 was generally determined from WOGH's pro rata share as estimated at 14 percent of its and Chinook's combined Canadian production volumes (December 31, 2015 – 14 percent). At December 31, 2016, \$0.1 million of this general and administrative recovery was included in accounts receivable (December 31, 2015 - \$0.2 million).

One member of Chinook's Board of Directors owns a significant shareholding in Alliance Trust Company ("Alliance"), which is Chinook's transfer agent. Fees charged by Alliance to Chinook totaled \$0.1 million in each year ended December 31, 2016 and 2015.

## 17. Financial Instruments and Market Risk Management

### Financial Instrument Classification and Measurement

Chinook's financial instruments carried on the consolidated statements of financial position as at December 31, 2016 were carried at amortized cost with the exception of cash, restricted cash and commodity price contracts which are carried at fair value. Chinook's cash and restricted cash was assessed on the fair value hierarchy as level 1 as it is transacted in active markets and its commodity price risk contract was assessed as level 2. The estimated commodity price contract's fair value is subject to changes in historical benchmark price volatilities and forward benchmark prices and interest rates. Assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the placement within the fair value hierarchy level.

### Market Risk Management

Chinook is exposed to a number of market risks that are part of its normal course of business. Management has primary responsibility for monitoring and managing financial instrument risks under direction from the Board of Directors, which has overall responsibility for establishing the Company's risk management framework. In the sections below, Chinook prepared a sensitivity analysis in an attempt to demonstrate the effect of changes in these market risk factors on its consolidated statements of operations and comprehensive loss. For the purposes of the sensitivity analysis, the effect of a variation in a particular variable was calculated independently of any change in another variable. In reality, changes in one variable may contribute to changes in another, which may increase or decrease the change. The assumptions made to derive the changes in the relevant risk variables in each sensitivity analysis were based on Chinook's assessment of reasonably possible changes that could occur at December 31, 2016. The results of the sensitivity analysis should not be considered to be predictive of future performance.

### *Commodity Price Risk*

Commodity price risk occurs as the fair value of Chinook's financial instrument contracts fluctuate as a result of changes in commodity prices. In the past Chinook has entered into various commodity price contracts to mitigate the exposure to commodity price risk. The

use of such instruments is subject to limits established and approved by the Board of Directors. Chinook's policy precludes the use of financial instrument contracts for speculative purposes.

Chinook had the following outstanding commodity price contract as at December 31, 2016 that had a fair value liability of \$0.2 million.

<b>Financial AECO Natural Gas Contract</b>			
<b>Portion of Contractual Term</b>	<b>Average Notional Volumes (GJ/d)</b>	<b>Company's Received Price</b>	<b>Indexed Price</b>
January 1, 2017 to December 31, 2017	7,500	\$3.205/GJ	AECO

This commodity price contract was assessed as level 2 on the fair value hierarchy. The fair value of this commodity price contract was determined through the difference in the referenced benchmark forward price as compared to the contract's strike price multiplied by the notional volumes during the remaining contractual term. Chinook had no commodity price contracts outstanding at December 31, 2015.

At December 12, 2016, the fair value liability of Craft's price risk management contracts was \$4.5 million. These commodity price contracts were also assessed as level 2 on the fair value hierarchy. This fair value estimate was included in the Craft's net assets as used to measure the value of Craft shares distributed to Chinook shareholders (see note 6).

As at December 31, 2016, management estimates that an increase (decrease) in the natural gas price of \$0.30/GJ would have resulted in approximately \$1.0 million decrease (\$1.0 million increase) in the fair value of this commodity contract.

Subsequent to December 31, 2016, Chinook entered into a commodity price contract with the following terms:

<b>Financial AECO Natural Gas Contract</b>			
<b>Contractual Term</b>	<b>Average Notional Volumes (GJ/d)</b>	<b>Company's Received Price</b>	<b>Indexed Price</b>
April 1, 2017 to October 31, 2017	4,000	\$2.50/GJ	AECO

### *Interest Rate Risk*

Interest rate risk occurs when the fair value of debt fluctuates because of changes in market interest rates. Chinook is exposed to interest rate fluctuations on its Demand Credit Facility which bears a floating rate of interest. As mentioned, Chinook had no outstanding debt as at December 31, 2016 and 2015.

### *Foreign Exchange Risk*

Foreign exchange risk occurs as financial instruments fluctuate as a result of changes in foreign exchange rates. Most of Chinook's financial instruments are indirectly exposed to currency risk as the underlying commodity prices in Canada for petroleum and natural gas are impacted by changes in exchange rate between the Canadian and the United States dollars. As at December 31, 2016, Chinook held US\$1.2 million in cash. Management estimates that an increase (decrease) in the US dollar, relative to the Canadian dollar, of 10% is possible and this would result in a \$0.2 million increase (decrease) in foreign exchange gains from this US cash held.

### *Financial Assets and Credit Risk*

Credit risk is the risk of financial loss to Chinook if a partner or counterparty to a product sales contract or financial instrument fails to meet its contractual obligations. As at December 31, 2016, Chinook was mostly exposed to credit risk with respect to its accounts receivable. Most of Chinook's accounts receivable relate to petroleum and natural gas sales and joint interest activities and are subject to typical industry credit risk. The credit exposure of \$2.3 million as included in accounts receivable at December 31, 2016 pertained to accrued revenue for December 2016 sales volumes. Chinook transacts with a number of commodity purchasers. Purchasers typically remit amounts to Chinook prior to the end of the month following production.

The remainder of Chinook's accounts receivable pertains to joint interest receivables. These are typically collected within one to three months following production. Of Chinook's accounts receivable at December 31, 2016, approximately 35 percent were owed from five companies of which \$1.3 million was subsequently collected by Chinook. The remaining \$1.0 million has been determined by management to be collectible.

Chinook's accounts receivable balance was aged as follows:

	December 31 2016	December 31 2015
Not past due	\$ 5,976	\$ 9,755
Past due by more than 90 days, net of allowance	682	1,418
	<b>\$ 6,658</b>	<b>\$ 11,173</b>

During the year ended December 31, 2016, Chinook reported \$0.6 million (2015 - \$1.1 million) of accounts receivable that were deemed uncollectable and charged to bad debt expense as included in the net loss from continuing operations.

Chinook's allowance for doubtful accounts was \$3.1 million as at December 31, 2016 (December 31, 2015 - \$2.5 million). When determining whether amounts that are past due are collectable, management assesses the credit worthiness and past payment history of the counterparty, as well as the nature of the past due amount. Chinook considers all amounts greater than 90 days after the due date to be past due. As at December 31, 2016, \$0.7 million of accounts receivable were past due and considered to be collectible.

Maximum credit risk is calculated as the total recorded value of cash, restricted cash and accounts receivable assets at the consolidated statements of financial position date.

### *Financial Liabilities and Liquidity Risk*

Liquidity difficulties could emerge if Chinook is unable to meet its financial obligations as they fall due within normal credit terms. The Company prepares annual budgets, which are monitored and updated as required. Generally Chinook will, over a reasonable period of time, limit its capital programs to available funds. Chinook frequently evaluates the options available, with respect to sources of short and long-term capital. Management believes that future generated cash flows as complimented, on occasion, with these sources of capital will be adequate to settle Chinook's financial liabilities

The following table details Chinook's financial liabilities as at December 31, 2016:

	Within 1 year
Accounts payable, accrued liabilities & other	\$ 11,218
Fair value of commodity price contract	154
	<b>\$ 11,372</b>

## 18. Commitments and Guarantees

At December 31, 2016, Chinook's contractual commitments required the following minimum future payments without giving effect to any offsetting third party agreements, which are anticipated to reduce some of these amounts:

December 31	2017	2018	2019	2020	2021	Thereafter	Total
Office leases	\$ 2,416	\$ 2,416	\$ 1,208	\$ -	\$ -	\$ -	\$ 6,040
Operating & transportation contracts	6,867	6,672	4,771	2,975	208	-	21,493
	<b>\$ 9,283</b>	<b>\$ 9,088</b>	<b>\$ 5,979</b>	<b>\$ 2,975</b>	<b>\$ 208</b>	<b>\$ -</b>	<b>\$ 27,533</b>

Office lease commitments relate to Chinook's head office in Calgary, Alberta. Operating and transportation contracts relate to minimum contractual payments if Chinook does not utilize the pipeline capacity or benefit from the operating services.

As a result of the voluntary reduction in the Previous Credit Facility's borrowing base to \$nil, Chinook was required to guarantee a total of \$1.3 million in outstanding letters of credit through depositing an equivalent amount in cash with its lender.

Chinook is involved in litigation and claims arising in the normal course of operations and from indemnifications provided to the buyer of its Tunisian operations in 2014. At December 31, 2016, claims from a former Tunisian service provider and the Tunisian Tax Authority totaled \$15 million. Storm BVI has provided the buyer indemnifications for claims of this nature which are guaranteed by Chinook. As of December 31, 2016, an estimate of possible future disbursements for these indemnifications, including professional costs, totaled \$1.2 million (2015 - \$1.2 million) and is recorded in accounts payable, accrued liabilities and other on the consolidated statements of financial position. There have been no payments for such claims during the year ended December 31, 2016. During the year ended December 31, 2015, Chinook paid \$1.9 million of such costs as reported on the consolidated statements of cash flow as a change in investing activities from discontinued operations. While the outcome of the remaining claims in excess of \$1.2 million is not known with

certainty, management is of the view that such claims are without merit and will represent Chinook's interests vigorously in any future legal or arbitration proceedings.

## 19. Other Supplementary Information

### Changes in non-cash working capital

	December 31 2016	December 31 2015
Cash provided by (used for):		
Accounts receivable	\$ 3,880	\$ 12,707
Prepays & deposits	(1,468)	106
Accounts payable, accrued liabilities & other	(10,328)	(21,126)
Craft non-cash working capital	1,638	-
	<b>\$ (6,278)</b>	<b>\$ (8,313)</b>
Cash provided by (used for):		
Operating activities	\$ (511)	\$ (116)
Investing activities	(5,767)	(8,197)
	<b>\$ (6,278)</b>	<b>\$ (8,313)</b>

### Cash interest and financing fees paid

	December 31 2016	December 31 2015
Cash interest & financing fees paid	<b>\$ 1,125</b>	<b>\$ 494</b>

### Consolidated statements of operations and comprehensive loss presentation

Chinook's consolidated statements of operations and comprehensive loss was prepared primarily by nature of expense, with the exception of employee compensation costs which were included in the production and operating, general and administrative and exploration and evaluation expense line items.

The following table details the amount of total employee compensation costs included in these line items in the consolidated statements of operations and comprehensive loss.

Year ended December 31,	2016	2015
Production & operating	\$ 491	\$ 1,315
General & administrative	3,969	2,332
Transaction costs	1,092	-
Exploration & evaluation	267	601
Total employee compensation costs	<b>\$ 5,819</b>	<b>\$ 4,248</b>
